(Attach the attendance list of Participants)

Activity Report: Discussion by Resource Person 1: The presentation of the honorable speaker showed us the basic information regarding types of venomous and non-venomous snakes, their identification, to assess the knowledge about various symptoms of snake-bite, as well as knowledge about prevention and care. The course's overarching goal was to create awareness among the participants.

The participants were very keen and actively participated in the Seminar. With this; the knowledge-filled day ended with a hope that they would have gained a lot of information from this and is able to create awareness among their neighbours.
